

**You Work 24/7
For Your Business.
So Should Your Server.**

Adding a server to your business can be an efficient and affordable way to help you and your employees reach new levels of productivity, while protecting valuable company data and supporting business growth.

Checklist - Does your business need a server?

If you answer yes to one or more of these questions, your business could benefit from a server.

- You want to share, store and access files from a central location.

- You need a secure, reliable system to backup business information.

- You are interested in consolidating and sharing equipment and resources, like printers and Internet access.

- You and your employees need access to company information when away from the office.

- You need to keep your critical business applications running 24/7 without worrying about a system crash.

- You want to protect your network from unauthorized users.

- You are looking for new ways to increase sales with an eCommerce site or customer database.

5 Reasons Your Business Deserves an Intel® Xeon® Processor-Based Server

A server based on the Intel® Xeon® processor delivers the reliability, security, and performance your small business needs - today and tomorrow.

- 1 SAVE TIME.** You and your employees can access and share information faster and respond to customers sooner from any PC or device on your network with the powerful performance of an Intel® Xeon® processor, while supporting new applications that can help grow your business.
- 2 GAIN PEACE OF MIND.** Purpose-built to operate 24/7, servers based on the Intel® Xeon® processor can automatically detect and correct memory errors that can lead to data corruption, and provide quick data recovery in the event of a hard drive failure.
- 3 FEEL MORE SECURE.** Built-in security features can help safeguard your critical company files, speed up encryption and decryption of sensitive data, and protect your server from unauthorized updates or changes.
- 4 NOT AS EXPENSIVE AS YOU THINK.** Entry-level servers based on the Intel® Xeon® processor are cost-comparable to high-end desktop PCs, with cost-savings benefits and additional features that can significantly outweigh the incremental investment.
- 5 NOT AS COMPLICATED AS YOU THINK.** You won't need a full-time IT person to install and manage a server, and your Intel® Technology Provider is there to help.

The Intel® Xeon® processor E3 family-based server - a smart investment in your small business.

Consult with an Intel® Technology Provider to determine which Intel® Xeon® processor-based server is right for you.
